Learn how to remotely share glucose data from your FreeStyle Libre 14 day reader with your healthcare provider.

Now You Know

* Fingersticks are required for treatment decisions when you see Check Blood Glucose symbol, when symptoms do not match system readings, when you suspect readings may be inaccurate, or when you experience symptoms that may be due to high or low blood glucose.

The LibreView data management software is intended for use by both patients and healthcare professionals to assist people with diabetes and their healthcare professionals in the review, analysis and evaluation of historical glucose meter data to support effective diabetes management. The LibreView software is not intended to provide treatment decisions or to be used as a substitute for professional healthcare advice. See last page for Important Safety Information.

**STEP 1: Create a LibreView Account**

Account Sign-up Steps:

1. Confirm Country / Region of Residence
2. Accept the Terms of Use (step not shown)
3. Accept Privacy Notice (step not shown)
4. Research Marketing (Making an Impact Together)
   - Opt In / Decline
5. Account Information (step not shown)
   - First and Last Name
   - Date of Birth
6. Login Information
   - Valid Email Address
   - Create password and store in a secure place
7. Verify Email Address to Complete Account Creation
8. 2-Factor Authentication (step not shown)
STEP 1: Create a LibreView Account

Account Sign-up Steps (continued):

1. You will receive an email to verify your account from LibreView. The email is sent to the email address that you provided in the previous step
   a. Open the email and click on the Verify Email button
   b. Switch back to your web browser and click Next
STEP 1: Create a LibreView Account

Your LibreView account setup is now complete:

- You may explore tutorials to Getting Started, Upload Devices, or Link a Practice from this page

1. Click **Done** to launch your LibreView account
STEP 2: Link to Your Doctor’s Practice

If you used an email invitation from your healthcare provider to create your LibreView account then your account is already linked to your healthcare provider and you can skip to the next page. If not, please follow the steps below.

If you would link to initiate a connection with your HCP:

Click on icon in the upper right corner

1. Select Account Settings from the menu

2. Select My Practices option

3. Enter the Practice ID provided by your healthcare provider
   Note: if you do not have this information call your provider to request it.

You can also remove your data sharing with a practice by clicking the Remove button.

The LibreView data management software is intended for use by both patients and healthcare professionals to assist people with diabetes and their healthcare professionals in the review, analysis and evaluation of historical glucose meter data to support effective diabetes management. The LibreView software is not intended to provide treatment decisions or to be used as a substitute for professional healthcare advice.
STEP 3: Upload Data to Share

1. Plug your FreeStyle Libre 14 day reader into your computer using the yellow cable provided with your system. This is the same cable that you use to charge your reader.

2. Click the Press to Begin Upload button.

3. After clicking the Press to Begin Upload button, LibreView will automatically search for your FreeStyle Libre 14 day reader.

4. The first time you upload data you will be prompted to download the LibreView Device Drivers.
   a. The drivers allow your computer to communicate with your reader.
   b. Click on the Download button specific to your operating system.

The LibreView data management software is intended for use by both patients and healthcare professionals to assist people with diabetes and their healthcare professionals in the review, analysis and evaluation of historical glucose meter data to support effective diabetes management. STEP 3: Upload Data to Share (Google Chrome)

If you use **Google Chrome**, follow the steps below. Otherwise, skip to the next page.

**From Google Chrome:**

- The file will download automatically and will appear in the bottom left corner of your Google Chrome browser
- Click to run the program

After downloading the files, follow the prompts to install the Device Drivers:

- When the InstallShield Wizard launches, it will prompt you to select the **Preferred language** for installation
- The InstallShield Wizard will then prepare for the installation
- Follow the prompts by clicking **Next** and then **Install**
STEP 3: Upload Data to Share (Mozilla Firefox)

If you use Mozilla Firefox, follow the steps below. Otherwise, skip to the next page.

From Mozilla Firefox:

- In the pop up download box, click Save File
- The download will appear in the Firefox toolbar, click on the ↓ to locate the downloaded file
- Click on the file name to run

After downloading the files, follow the prompts to install the Device Drivers:

- When the InstallShield Wizard launches, it will prompt you to select the Preferred language for installation
- The InstallShield Wizard will then prepare for the installation
- Follow the prompts by clicking Next and then Install
STEP 3: Upload Data to Share (Safari)

From Safari:

- The download will appear in the toolbar on the top right of the window
- Click on the down arrow to locate the downloaded file
- Click on the File name to run

Downloading LDD – InstallShield Wizard For Mac:

- When the InstallShield Wizard launches, the Wizard will prepare for the installation
- Follow the prompts by clicking Continue, Continue, Install and then Close

The LibreView data management software is intended for use by both patients and healthcare professionals to assist people with diabetes and their healthcare professionals in the review, analysis and evaluation of historical glucose meter data to support effective diabetes management. The LibreView software is not intended to provide treatment decisions or to be used as a substitute for professional healthcare advice.
STEP 3: Upload Data to Share

Confirm the Installation is successful:

1. Once the installation is complete, click on the Press to Begin Upload button

2. LibreView will automatically detect the LibreView Device Driver is installed and will search for a compatible device

3. Once the device has been detected, the screen will change to Gathering Device Information and will launch to My Glucose History so Reports can be retrieved

4. Your glucose data should now be available for your healthcare provider
